ABOUT

Motivated and detail-oriented web developer proficient in the MERN stack with foundational knowledge in software engineering principles, design patterns, and methodologies. Skilled in Java, Python, and C++. Strong communicator with a commitment to continuous learning and excellence in fast-paced environments.

EDUCATION

Bhaskar waman Thakur college

Mumbai

Bhaskar Waman Thakur College, Mumbai

Bachelor of Computer Science (Information Systems Option)

June 2022 – April 2025

GPA: 8.6/10

Relevant Coursework: Software Development, Coordination, Programming, Efficiency

PROJECTS

Coursify (Online course brand web application)

- Developed a comprehensive online course website with sections including About Us, Courses, Contact Us, and a stylish landing page using React.
- Applied modern web design and UX principles to create an engaging, visually appealing brand presence, resulting in increased user engagement.

Pharma E-Commerce Store

- Designed and implemented a user-friendly e-commerce website tailored specifically for a pharma store.
- Ensured a seamless ordering process, allowing customers to browse medicines, view product details, and place orders.

Personal portfolio website

- Designed and developed a personal portfolio website using React, showcasing my skills, projects, and expertise.
- Leveraged animations and transitions to create an eye-catching user interface that leaves a lasting impression.
- Ensured responsiveness across various devices, providing a seamless experience for potential employers and clients.

SKILLS & INTERESTS

Languages:	Java, Python, C/C++, SQL, PL/SQL, HTML, CSS, JavaScript, Kotlin
Frameworks & Libraries:	Angular, React.js, Express.js, Node.js
Tools & Platforms:	IntelliJ IDEA, MS Visual Studio, MySQL, Android SDK, MongoDB, AWS
Software Development:	Software Engineering Principles, Design Patterns, Agile Methodologies

EXPERIENCE & CERTIFICATIONS

JPMorgan Software Engineering Job Simulation

November – 2023

- Utilized data visualization software and Python to monitor stock price trends and develop trading strategies.
- Implemented a user interface using React.js and TypeScript, demonstrating modern web design skills.

Data analysis and programming with python

April – 2023

- Completed a comprehensive certification program in Python programming, demonstrating proficiency in core concepts, advanced techniques, and practical applications.
- Gained hands-on experience with Python for data analysis and problem-solving, contributing to increased efficiency and innovation in project execution.

EXTRA CURRICULAR

Collaboration at Omniversity

- Demonstrated a strong ability to work with senior colleagues on various projects through the Omniversity platform, enhancing teamwork and leadership skills.

Tutoring

- Volunteered as a tutor for introductory programming courses, helping peers understand fundamental programming concepts and improve their coding skills.
